

What an unforgettable, meaningful, fruitful experience in UK with the great team.

It's a knowledge trip. The teachers in UWTSD prepared the lessons seriously, organized the classes with diversification, communicated to us happily ranging from study to life. The courses are efficient. Not only obtaining the professional education theory, system, paradigm, which provides analysis tool for directing and reflecting whenever we need during the education process, but also grasping the research methods to solving problems, which would play a long-range role in education and academic career.

It's a cooperation trip. Actually, we have a few opportunities to study, work, live and play with our colleagues from different majors. With various academic backgrounds, we discuss the questions and view phenomenon via multi perspectives, which providing the chances for team work. Everyone has strengths and weaknesses, we appreciated the strong points and introspecting ourselves so that creating a progressive experience.

It's a cultural trip. UK possesses quite different civilizations from Chinese nation. At the beginning of modernization, the Europe had made great progress rapidly and UK is the place where industrial revolution begins. Because of the fast accumulation of material wealth, they have more energy to think about the world and life of human beings. We witness the achievements in history, literature, arts, philosophy and natural sciences. Although we have developed quickly, what we should take into consideration for the great rejuvenation of the Chinese nation is the soft power.

It's a mission trip. Our group have measured the main capital cities in UK with steps, like London, Edinburgh and Cardiff. These three places are quite different, which offers abundant materials for thinking deeply the common contents and disparate creations for the two types of moderation. The most important mission for me is visiting Marx in Highgate cemetery in London. I was satisfied to put a white flower in front of Marx' s tomb and look at him with respect. After hundreds years of his passing away, the Chinese nation had transfer the critical weapon to power changing the world in remote and east area.

With grateful heart for all we have in the past month during our summer courses, best wishes for my leader, colleagues, friends and families.
